Aoxio update instructions

Important Before applying the update **v 2.2** make sure you are using **v 2.1** (You can check the current version to login your admin panel > footer), If you are using an older version please contact our support codericks.envato@gmail.com to get the previous versions.
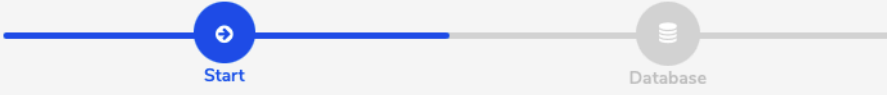

Step 1: Download the latest script and extract it on your pc. Open **aoxio_v2.2** > **updates > v2.2 > uploads** folder there you will see **3 zip files** inside the **"uploads"** folder now you need to upload these zip files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file and extract it
- **config.zip** > upload path: Goto your project **root folder > application > config** upload this zip file in this folder and extract.

Step 2: Open the latest downloaded script and upload this "**updates**" folder on your server project root folder and replace.

Step 3: Open a browser and write a url like this: **www.yourdomain.com/updates/v2.2** you will see a page like below here enter your item purchase code for update this script.
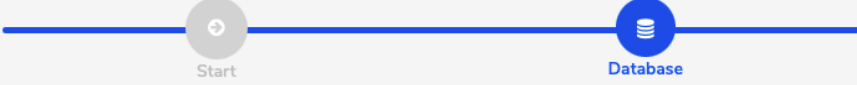

Step 4: Here provide your current database credentials and wait a few seconds to update your scripts.

If you are using a multilingual feature then this step is for you.

Step 5: After successfully updating login as Admin go to language from left sidebar and translate new language values type (**user**).
